

Job Coordinator: Operator: AJ Moore

ArtPro Version Number: -

Standard lay-out Label Scale: 1:1, Units: mm

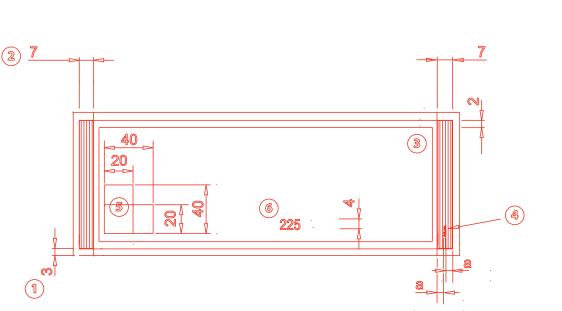

1 The design should bleed off for 3 mm.

- 2 7 Mm of both the right and the left side of the label needs to be text and varnish free: location of adhesive edge.
- 3 Variations in cutting can amount to approx. 2 mm. So do not place texts outside the text area.
- 4 Article number should be printed (8 pt) in right adhesive edge, vertically oriented and
- 5 The back side must have an EAN-code. This area needs to be 20 x 40 mm and should be placed within the text area. Direction can be horizontally or vertically.
- 6 The label must contain the text: 225 'with height of minimally 4 mm.

Remarks

front side

Put possible alternate texts and the EAN code on black film, do not cut them out of the background colours. Small texts should not be built up in various colours. Use 80 g paper, cast coated on one side. Number of colours: offset 4 x process and maximum of 1 pms + white of the paper + varnish.
